

Leading the Way Through Innovation

INTELLIGENT SYSTEMS, ADVANCED TECHNOLOGIES

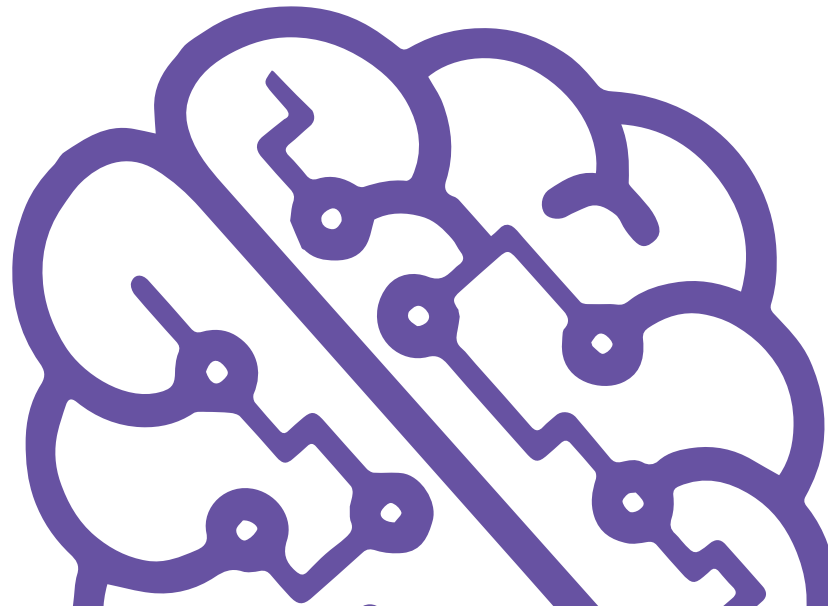

Our industrial engineering division at UMS automation specialized in developing & implementing automation projects tailored to our customers' specifications and financial requirements.

DESIGN, DEVELOPMENT AND IMPLEMENTATION

Design, development, implementation, project management, and superior customer service are among just a few of the levels of expertise and commitment we provide to our customers.

TURNKEY FABRICATION SOLUTIONS

Our automation division can also offer turnkey fabrication solutions to provide a more comprehensive service package where desired.
